

Although the focus here is on ALLENs of the largest southern [ALLEN Patrilineage 1](#), I've abstracted below^[1] ALL the households headed by people surnamed ALLEN (in all spellings) in the USCensus for the North Carolina counties for the indicated years:

Anson	1790	1800	1810	1820	1830	1840
Franklin	1790	1800				
Iredell	1790	1800	1810	1820	1830	
Johnston	1790	1800	1810	1820	1830	
Lincoln	1790					1840
Montgomery	1790	1800	1810	1820	1830	1840
Rowan	1790	1800	1810	1820	1830	
Rutherford	1790	1800	1810	1820	1830	1840
Wake	1790	1800	-lost-	-lost-	1830	1840
Warren	1790	1800				

Also, for [1850](#), I've abstracted all the households in Anson, Cleveland, Iredell, Montgomery, Rowan, Rutherford, Stanly, and Wake Counties containing ALLENs who were born before 1800, and for [1860](#) I've done the same for Iredell and Wake counties only.

I've also abstracted all of the Drury ALLENs in these counties through 1830, in an attempt to determine where the 1830 Drury Allen in PersonCo may have come from.

The original copies of the USCensus records filed at Washington (now in the National Archives) from which these abstracts have been made, generally contain evidence of neighborhood propinquity, since the lists were compiled by systematically canvassing townships or local areas of each county door to door^[2]. At the very least, counties were subdivided into local census sections, and the sublists compiled and sent to Washington reflect those subdivisions and help classify different clusters of probably related ALLENs by their shared local neighborhoods. At best, adjacency or proximity on the local sublists denotes adjacency or proximity on the ground, and I've made every effort in my abstracts to preserve this evidence by noting sublist groupings, and for the pre-1850 lists, the sequential line number of each household on the page.

For that reason, I've also sometimes abstracted households headed by people whose names appear in association with ALLENs on the various evidential documents of a county—probably because they were at least neighbors, if not also friends or in-laws.

Unfortunately, the authorities sometimes organized these county lists in ways that destroyed the original evidence of propinquity. Often, local sublists were concatenated together without differentiating them, and sometimes they were even alphabetized on first letter of surname (FLS), or occasionally, and eccentrically, on first letter of given name (FLG), thus obliterating evidence of likely adjacency or neighborhood propinquity. However, where such concatenated lists were also alphabetized, the transition from one A-Z grouping to another, does nicely delimit one local list from another.

Where one of these alphabetization regimes has been imposed on a local sublist (or sometimes even county-wide) I've annotated the subheading of my abstracts either FLS or FLG.

¹ My source for these abstracts was the Ancestry.com Federal Census Collection. My abstracting conventions are defined [here](#).

² Though one must suppose that some households were entered outside of their local neighborhood context because no one was home when the enumerator first visited.

Runnell Allen	2	4	2	0	1	
WakeNC-----: 103R						
Young Allen	1	4	1	0	2	
WakeNC-----: 104L						

These three ALLENs, who can be identified as Reynold4 ALLEN and his sons Young5 and Reynold5, don't appear in the surviving USCensus pages for WakeCo (I've scanned them all). Instead they are taken from the Hillsborough Census District (which includes WakeCo) abstracted *U.S. Bureau of the Census, Heads of families at the first census of the United States taken in the year 1790: North Carolina* (GPC, 1973).

Though the original source for these abstracts seems to have either disappeared, or at least not been filmed, the surrounding records context is of a piece with that of the filmed USCensus pages for WakeCo; that is, names have been rather eccentrically sorted FLG (by First Letter of GIVEN name) not the more usual FLS, or first letter of surname. Though this sorting has obliterated the most local evidence of geographical propinquity, these three ALLENs all appear on the same FLG sublist for WakeCo, and they are the only ALLENs on this sublist, where we also find such known neighbors and associates as David Justice, and William Shipp.

Other WakeCo ALLENs and otherwise associated surnames: ALFORD, FERRELL, GILL, HORTON, and RAY (also grouped by FLG sublist)

According to an Ancestry.com abstract there is a John Wilson household with females of suitable age to be the Mary who married William G. Allen, say 1811, but the entry is misindexed. Most of these RutherfordCo Allens own looms; Larkin is one of the few who don't; one of the Johns also owns a still.

NORTH CAROLINA, MONTGOMERY County

The county was enumerated in three districts: the largest was EAST of the PeeDee and other the rivers, another, half the size was WEST of the PeeDee, and the third, smaller still, was unidentified. Since the latter begins on the folio after the last for the WEST section, I suspect that it's just a continuation of it.

The discrepancies in the Lilly household total can probably be explained by the fact that the image is so overexposed in places as to be virtually illegible. However, there's no doubt that the totals for John M. and Thomas Allen are wrong— the enumerator misread the columns and attributed the 27 slaves for the household on line 17 to John M. Allen's household on line 18.

These abstracts are complete only for the older ALLENs (the ones born before 1810). The most interesting one, though is a Young T Allen, so I've abstracted the Allen households near him. I note that one of these is headed by a Josiah. These are both names which run through the Allen (I) patrilineage.

This is James6 (Young5, Reynold4), who is supposed to have married, second, in 1749, Priscilla Jackson, his first wife having been Mary Wynne. That James was married in 1749 is supported by the "mCY" check mark, meaning "married within the Census Year (btw 2Jun1849-1Jun1850), though the same column should have been checked here for Priscilla. The ages of James and Priscilla were quite reasonably read by the Ancestry indexers as "48" and "45", because the enumerator used a hasty abbreviated form for many of this "4"s and "6"s that look alike; the the ages of these two in the 1860 census for WakeCo are 78 and 75, respectively.

All the following WakeCo households headed by ALLENs born before 1800 are within 7 census pages of each other, but they may not be as geographically proximate as it seems, since they also span three different post offices.

Allen Patrilineage project member William Jeremiah ("Jere") Allen supposedly descends from Alonzo J. Allen of PanolaCoMS (aged 43 in the 1900 USCensus, and born in NC), but this is the second of two WakeCoAlonzos of about the same age, the other appearing in the household of George B. Allen, above. Which is the PanolaCoMS man?

Jere says that his WakeCo Alonzo died in the Civil War, and though I haven't verified this myself, it's reasonable to assume that the Civil War casualty from NC was one of these two WakeCo Alonzos since they are they only two who turn up in the 1860 USCensus.

The household immediately preceding this one was headed by Peleg Bailey (aged 66), and in the 1870 census, we find an Alonzo Allen (14) in the household of Peleg Baily of WakeCo.

I also note that this 1860 Alonzo (apparently the son of Wyatt & Martha [BAILEY] Allen, and grandson of John Allen) had an apparent newborn brother William, and in the 1880 USCensus for PanolaCoMS we find Alonzo Allen (aged 23) and W[illia]m A. Allen (20) in the household of M.A. Lowery.

Given the context of this 1860 household, this should be enough circumstantial evidence for us to conclude that the 1900 Alonzo J[eremiah?] Allen was the son of the Wyatt Allen who died in the Civil War, and the grandson of the John Allen who heads the above household.

This couple presumably corresponds to Anderson H. Allen m(bond). Sarah H. ROGERS 20Oct1837, and the next HH is headed by Benjamin & Ann Rogers, 72 and 60, respectively, likely Sarah's parents. MILLERS, 316, identifies this couple as Henry Anderson & Sarah Elizabeth Rogers, with no evidence to contradict either the marriage records or this one.
