

This a collection of abstracts of the annual county Personal Property Tax (PPT) records for DENNISONs and other possibly related folk, in some cases supplemented by summaries or yearly specifics of the corresponding Land Tax record, highlighter in [Teal](#).

The [Introductory Notes](#) link to sections of this report defining my abstracting conventions, and providing background information necessary to understand and interpret the raw data of these lists. I've also provided sections detailing the genealogical background of several of the DENNISON [patrilineages](#). The only generational superscripts herein pertain to the descendancy of Daniel¹ of AugustaCo.

All of these abstracts are based on the original finalized lists returned each year by the counties to the Commonwealth authorities in Richmond. I've accessed the original images in their original records context either from Library of Virginia or LDS films, or from digitized images of those films at the Binns Genealogy website (since folded), or, most recently, from the digitized films made available online at the LDS FamilySearch site. Most of the original PPT lists, and some of the corresponding land tax records, can now be accessed via the LDS [FamilySearch Catalog](#), provided one has first established and signed in to one's free FamilySearch account.

My corresponding "Src" citations depend on the source, and since the Binns image#s are no longer online, their sequential image#s only show the position of each page within a specific list. My more recent additions cite to the "Im[age]#" of the digitized FamilySearch film, now identified by its unique DGS number, to which in most cases I've provided links in the head notes for the relevant county. Clicking the link for the relevant year range and entering the Image# will bring up the original image for each line of my abstracts.

The following table provides an inventory of the counties and ranges of years I've abstracted, as well as a few links to assist in navigating this long report. It also provides a conjectural grouping of records by named identity and ranges of years (with sometimes a few gaps), which, though well considered, should not be taken as definitive, or be used a substitute for a close analysis of the records themselves.

I've taken pains in my abstracts to indicate all adjacent clusters of likely or possibly related names on the original lists with the "{" character, and where available (as they are for most of the records from 1787 on) the dates that each household was canvassed.

Introductory Notes

The abstracts in this report, which concern largely Virginia-based DENNISONs, and in some cases their in-laws, are all based on the series of county tax records that was begun by Virginia law in 1782 to standardize the assessment and collection of revenues to address the huge debt run up in the Revolutionary War and to sustain the new Virginia Commonwealth.

By law, a fair copy of both the personal property and the land tax lists had to be returned to the VA authorities in Richmond, and it's the images of these lists that have been my source, as archived and filmed by the Library of Virginia. I have either borrowed these films from LVA through interlibrary loan, accessed them indirectly through Binns Genealogy's Tax List Club, or via the same films digitized by the LDS and available online in the FamilySearch database.

The format of these county lists changed over time, both in compliance with new mandates by the Virginia Assembly, and at the county level because of the varying interpretation of the law by the county sheriff who was charged with the collection of the taxes, and by his individual tax commissioners, and there is need to pay attention to these changing conventions over time.

I've provided an overview of Virginia colonial and early Commonwealth taxation, with particular attention to the three periods covered by these abstracts (1782-1786, 1787, and from 1788 on) in two papers:

[Virginia Taxes & Tax Lists for the Colonial and Early Federal Period](#) provides an overview of VA taxation with some detail on these three periods, and, most importantly (on page 7) my conventions for abstracting these records; and

[Interpreting the Annual Virginia Tax Lists from 1782 on, and their basis in Law](#) digs deeper into the weeds, and provides extensive commentary on drawing inferences from these lists.

Augusta County, Virginia, Personal Property Tax Lists, 1782-1858 (Sources: see notes below) _____

The AugustaCo personal property lists need to be considered in the context of other contemporary AugustaCo DENNISON evidence.

Only a smattering of the pre-1782 AugustaCo tithables lists survive, but there appears to be a complete set of these for the year 1777, which has been published in a series , and one of these lists has three DENNISONs: John Dunnason, Rob[er]t Denniston, and Ja[me]s Denniston, the first by himself on the first page, and other two listed together, verso; each is charged with one tithable (himself), which is to say that none headed a household containing any other white males aged 16 or over.^[1] The fact that Robert and James are listed adjacent to each other, but separately from John, and that their name is spelled differently, probably means that John was of an entirely different family, and Robert and James can be identified as the sons of the John Denniston who settled on North River in the area of northern AugustaCo that was hived off in 1778 to make RockinghamCo. This area also included Daniel² Denniston and his sons, including one named John who would have been about 27 in 1778, and others who would have qualified as tithables, but none of these are on this particular list.

The compiler of this list was Capt. Daniel Smith, who headed a company of Fincastle militia ostensibly present at the 10Oct1774 Battle of Point Pleasant; Fincastle was a short-lived (8Apr1772-31Dec1777) county created from BotetourtCo which was spun off from the southwestern part of greater AugustaCo in 1770, but Smith's company probably drew on the scattered population of westernmost settlers just to the north of Botetourt/Fincastle in the area that became BathCo in 1790, where Back Creek is situated.

The other names on this list are unfamiliar to me, and from the presence of Germanic-sounding names, I would be more inclined to place them in the RockinghamCo area, but more research would be needed to make this judgement definitive. Ironically, Robert and James Denniston have associations both with the RockinghamCo area and with BotetourtCo, where, about 1775, the estate of a John Denniston who was probably either their father or their brother was probated.

It's possible, therefore, that this early John Dunnason was John³ Denniston, the son of Daniel² Denniston, who settled first in northern Augusta/RockinghamCo, but who resettled a bit south, back into AugustaCo proper, about 1786, but I suspect that he was instead the John who surveyed and patented two tracts of land on Back Creek in western AugustaCo in 1781 and 1783 respectively, and who appears on the personal property tax lists for western AugustaCo beginning in 1782. The "t"-less spelling is one factor in my supposition, although the surname of John³ (Daniel²) also begins to appear without the "t" about this time, as the Augusta lists beginning with 1786 show.

Just to complicate matters further, there is also a 1781 AugustaCo order book record of one John Denston joining others in petitioning for a road from Levi Moore's on Nap Creek, up Back Creek to the head of the South Branch of the Potomac, and on 22May1782, Moore, George Hole, and John Deniston were deputed to mark the proposed road.^[2] This strikes so close to the home of John Denison, the 1781-1783 patentee of Back Creek, that even though there are virtually no instances of the Scottish "t"-spelling in any of the records for him or his conjugal family, and even though he gave one of his sons the distinctly non-Scottish given name Jonathan, this road order suggests that this family may have had Scotch-Irish roots after all. More likely, though, the "t"-spelling was the gratuitous "correction" of the AugustaCo clerk, who was more familiar with the far more prevalent Scotch-Irish DennisTons of the Valley.

¹ "Augusta County Tithables, 1777", in *The Virginia Magazine of History and Biography*, 44(Nov2006):308-309.

² Chalkley, *Chronicles of the Scotch-Irish....* 1:446-7, citing a loose undated paper (the petition), and 1:226, citing Augusta OB17:385 (the road order).

Searches of the later AugustaCo personal property tax records encompassed certain known or suspected in-laws and other close associates of the John³ (Daniel², Daniel¹) DENNISON line, and the abstracts below include all NOBLEs (since James Noble married Margaret Dennison, a daughter of John³, James Noble's guardian Samuel SOMERVILLE, and later, certain of the known or suspected in-laws of the ancestors of DENNISON Surname DNA Project members, which include the John Dennison who married Sarah LANDES in AugustaCo on 10Dec1840, and the James A. Denison who married Jane Given in NicholasCoVA in 1854. Representatives of other families allied to this one, in particular HENDERSONs may be added later.

After 1790, DENNISONs were found only on the AugustaCo District 2 lists of tax commissioners Joseph Bell, James A. McCue, and James Nelson, *et al.*, and I have therefore not bothered to specify that all such DENNISON abstracts come from these lists. Notwithstanding, I have checked all the District 1 lists for DENNISONs as well.

SOURCES:

My original source for most of the abstracts through 1795 was the Binns online database, which consists of photocopies of the original faircopy lists filed by the county sheriffs with the Commonwealth authorities in Richmond, and microfilmed and archived by the Library of Virginia. After 1795 my source was this same series of microfilms borrowed from the Library of Virginia on interlibrary loan, as indicated in the table below. In recent years, the need to borrow many LVA films has been obviated by the LDS digitization of their own films of these records. Because all of these lists are alphabetized by first letter of surname, but have no pagination, I have made no attempt to cite anything more specific than the year. The LVA microfilm#, and the LDS DGS#s for these AugustaCo PP tax records are:

The key below that defines the flags appears at the end of the list where most of the names associated with the road are clustered, suggesting that the list was compiled somewhat geographically as Gwin systematically canvassed his district.

Despite the Scotch-Irish "t" spelling of DENNISON, there is no doubt that this is the right local list of inhabitants of the westernmost settled areas of AugustaCo, including Back Creek; the "t" spelling could be an interpolation by the tax commissioner who was more familiar, at this point, with the more prevalent Scotch-Irish Denniston families of the main Valley of Virginia. In rhis case, Poage's list seems to span John DENNISON of East Back Creek, for whom John Gregory was a close neighbor, and the TACKETs some 6 miles to the WNE around Sitlington Creek.

 * 1784 AugustaCoVA *

The "A" list for this year appears to be mere a consolidated and Alpha FLS version of the "B" list. While the "B" list thus does a better job of localizing the tithables, the "A" list appears to usefully adds category for WMTs16-20, however, there are so few entries in this column (and none of the "B" lists that I noticed had such a column, that I don't think the absence of an entry in this column can be taken to mean that there were no such minor tithables in any particular household. For this year there is just one DENNISON, no James DAVISON, or any LUNSFORD, or any REDDEN or READING, though there is a James Readay 1-0-0-0-2-4. I've included these two DAVISes, however, and in other lists below, because one is named James DAVIS, and the syllable "vis" in underlined in the 1785 AugustaCo marriage record for James Davison and Sarah Dinnason, on the same day, and under the auspices of the same minister who married "Keterenah Dinaisons" to Thomas Tackett.

The "B" List

This is the typical set of concatenated lists by different commissioners, including William McPheeters, Charles Cameron, etc. Since all the entries seem to be identical, it is presumably the original from which the consolidated, alphabetized fair copy List "A" was derived. Furthermore, since John Denison here is on the same small list of others who are associated with the far western part of the county, while the other John DENNISON, John³ (Daniel², Daniel¹) Denniston, was still located in RockinghamCo, in the Dry River area, we must presume that the John Denison here, is the owner of the two tracts of 205 and 400a patented the previous May/June "on the waters" of Back Creek, adjacent to Thomas Lewis, with the 205a also being adjacent to "_?_ Grigory". Although the TACKETTs are present here, James and Walter Davis, are not on this same far western list; there is, however, a well-to-do John Davis, who could conceivably be their father.

This is the last appearance of a John Dennison on the same western list as William Green, Mary Gregory, Samuel Vance, etc.. Also on this list is Thomas Tackett—presumably the same Thomas Tackett who was married to Keterenah Dinasons (a germanicized version of Catherine Dennison) by Samuel Shannon on 4Jul1785. However, there is no James Davison who was married to Margaret Dennison on the same day by the same minister, but the above James Davis is listed next to John Dennison. The syllable "vis" of "Davison" is underlined in the AugustaCo marriage book entry; perhaps this is meant to be a correction?

List "A": "Taxable Property Returned in 1786"

This was apparently the single complete alphabetized list returned by the county sheriff to the Commonwealth authorities, probably in late 1786. It contains only this one John DENNISON.

List "B": List of Charles Cameron, for Capt. Campbell's company

This list, mis-grouped by Binns under the "B"s, was evidently the original list from which the preceding John Denison entry was compiled.

In the above list, the proximity of the Searights of Naked Creek, Samuel Frazer of Long Meadow (just to the south), et al., shows that this "John Dennison" must be John⁵ (Daniel², Daniel¹) Denniston of Naked Creek in central AugustaCo, a member of DENNISON Patrilineage 1.

There is no John Dennison on the above long list of western Augustans, which seems largely complete, and the only male DENNISON who appears from now until after 1800 is John Denniston of Naked Creek, in the main valley. I suspect therefore that John of Back Creek died between the spring of 1785 and the spring of 1786, and it appears that in AugustaCo, estates in process were generally exempted from personal property taxes. Mary Denison, widow, appears on the western list for AugustaCo only in 1790, which was the last year before this area was hived off to form Bath County.

This list has been alphabetized by first letter of surname, and the three Tackett's aren't listed adjacent to each other, so may not have been close neighbors, and in fact the consolidated list of 1785, that's a concatenation of the many individual local lists groups Lewis and Francis on one, and Thomas and George on another. Finally, the land tax records indicate that only Lewis was a landowner, and my research places some of his land around East Sitlington Creek, some 7-10 miles west of the DENNISONs of East Back Creek (in BathCo from 1791 on), and though Lewis's land there was in close proximity both to the land of Margaret (DENNISON) LUNSFORD, and (from abt 1805) her putative brother John, Lewis does not appear on the personal property tax lists of BathCo, and was thus presumably an absentee landlord. Nonetheless, given the rarity of the surname TACKET, it's a near certainty that all of these TACKETs were closely related, and most likely Lewis was the father of the others.

There's a note at the end of Bell's 1791 list that his third column, for blacks aged 12+ is meant to be inclusive of blacks also aged 16+. I have therefore changed my usual Black tithables heading from "12-15" to "12+". Inspection of other list indicates that this is not the most usual interpretation of this category.

1Mar	Dennison, Nancy.....	-	- -	1

Nancy is probably Nancy (?) (PARRY), the widow of Samuel M of RockinghamCo, who last appears on the lists of that county in 1835. There is very little chance that this is Nancy (McFALL), the wife of Daniel⁴ (John³) DENNISON, given that Daniel and his Nancy removed to KY about 1820, and that Daniel himself, who survived until 15Jan1864 when he died in KY, never appeared on the lists of AugustaCo after 1817.

This year marks the first appearance of a new John DENNISON in AugustaCo, and here I abstracted all LANDESeS and GIVENSeS as well.

David Landis (of D[aniel?]) evidently emerges from Daniel's 1837 household with it's 3 WMTs; he is thus presumably Daniel's son, hence "of D".

"N.R." stands for "North River" in northern AugustaCo, near the RockinghamCo line, and this John, whose tax information was gathered the same day as David Landis's, is presumably the same John of the 1837-1840 lists. The John Dennison of North River was thus, apparently, a close neighbor of David Landis, and this is confirmed by the fact that on 5Mar1844 John purchased 61+2a from Henry Rader, the latter tract abutting the land of David Landis. At present, I have no explanation for the other John Dennison on the list whose tax information was gathered the same day as that of Martin Dennison.

 * 1845 AugustaCoVA *

The 2nd District tax commissioner, James Nelson, stopped recording dates of tax gathering at this point, and after this year (1845) I've stopped abstracting LANDISes until dates resume with a new commissioner (John G. Stover) in 1857; for this list I've abstracted all LANDISes—all of these but (probably) John, and Daniel Sr, appear to be the latter's sons.

It is perhaps worth remarking that this first year after John Dennison purchased his land (and he was to buy more in subsequent years), he also acquired a young slave. The 1854 list includes a John Landes (black smith)—presumably the same John who is "(B.S.)" above.

At this point, the tax lists become more informative, and a new commissioner for District 2, John g. Stover, begins noting the dates of tax gathering. I have therefore begun to pay attention again to the proximity of David and other nearby LANDESEs. Although I've in general only abstracted those LANDESEs who are closest to John DENNISON in tax gathering dates, I've in some cases captured the images for all of them (all the "L" surnames).

The new category of White Male Tithables aged 21 and over, explicitly excludes men exempt for reason of disability.

John Dennison named his brother-in-law David Landes and "his [David's] brother" William Landes as joint executors of his 17Mar1756 will, and it seems from this tax list that the Landeses who head a joint household here must be the same pair. What then, of the second David, who has been for many years [bracketed](#) with, or a close neighbor both to Daniel Landes of North River, and to John Dennison himself, and is presumably the same David who has repeatedly been identified as David (of D[aniel]), i.e. Daniel Sr's son?

One might suppose that David of the compound with William was double-counted here, and there are no households headed by a William Landes the next year, 1855: however, there are in 1855 both David Sr and David Jr. It is probable, therefore, that the David & William Landes whom Dennison made his executors, the David Landes who in 1859 acted on behalf of John Dennison's heirs by lodging a fictitious chancery suit against them, and the David who made his will in 1865 leaving his estate to his brother William, along with the charge to act as guardian to the heirs of John Dennison, was the David Jr here, and not David Sr, the son of Daniel. These circumstances, coupled with the fact that John Dennison's marriage bond speaks of his marriage with Sarah Landes, daughter of John, makes this David Jr and William, both sons of one of the John Landes's of AugustaCo, presumably the John Landes of North River here whose household lies in proximity both to those of his sons and to John Dennison's.

Bath County, Virginia, Personal Property Tax Lists, 1791-1810 (Src: BathCoVA Library of Virginia film 31)_____

The BathCo tax lists appear on the LVA film in chronological order by year, and within that there are one or two tax lists for each year, which I've identified by the name of the list taker. Because I have made photocopied (digitized) images of all the Virginia tax records in which probable ancestors or collaterals of Jonathan DENNISON of LawrenceCo appear, and because the PDF filenames for these images end in a sequential 4-digit number, I have keyed these abstracts to the image#s by inserting the latter into the "Src" field, in place of the Binns' list and page# citations I employ for my references to those online resources. Binns hasn't digitized the BathCo PP records, but they're also available online now at FamilySearch.

I've scanned through these BathCo personal property tax lists looking for DENNISONs and the known in-law names, Reuben LUNSFORD/LUNCEFORD, and James READING/REDDEN as far as 1814, or for as long as these names were to be found on the lists. Virtually all of these lists have been alphabetized by first letter of surname, so for the usual case I needed only to scan all the "D"s, "L"s, and "R"s for each list, and not all the names of the entire list.

There were two lists for the first four years, but beginning in 1796 it appears that one consolidated list was made for the entire county, although the lists may bifurcate again later. The initial tax commissioner, Samuel Vance, was a carryover from AugustaCo, and he and James Vance handled most of the lists for the first ten years or so.

I didn't systematically track either James DAVIS[ON] in BathCo, because "James Davis" is a different name from the "James Davison" who married Sarah Dinnison at Windy Cove church (in now BathCo). However, I've noted a few instances of James DAVIS who appears to have been a close neighbor of these DENNISONs of Back Creek.

As for Thomas TACKETT, he had already dropped off of the parent AugustaCo lists by 1790, but when I discovered recently that Lewis TACKETT (one of the only three in these parts, the other being Francis) owned land on East Sitlington Crk near the LUNSFORDs, I scanned the BathCo PP records for TACKETTs through 1800, but without finding any. Presumably, Lewis was an absentee landlord.

Just how close geographically is Jonathan to John and Thomas? Based on the dates found on these two pages of "D"s and "R"s, I'd estimate that there were about 25 distinct tax gathering dates from early March to early May. Besides 25 and 27 March, there was also a 26 March, so Jonathan is found in the same general vicinity as John and Thomas, likely not far from Back Creek, but not, it would appear, on the actual DENNISON property. More problematic, perhaps, is that this is Jonathan's only appearance on the BathCo lists, or in any of the BathCo records as far as I can see, unless he was a witness to deeds. I found no trace of him in the order books through 1812.

The "*" next to Thomas's name is in the original, but I'm virtually certain that it's a modern interpolation, meant to flag what appears to be a duplicate entry. In this same list of surnames beginning with "D"s, there's one other item flagged—William Davis Sr—probably marking the fact that there's also a William Davis [though no Sr or Jr] on the same list. I suspect that both George and Thomas DENISON here are overlapping, if not exactly duplicate, entries (George owns 3 horses in one entry, eight in the other). I think that there were two lists taken at different times, one of them with just a few names, and that the lists were merged into a single faircopy list when the county personal property tax records were prepared for the state authorities.

No DENNISONS from 1835-1838

Fauquier County, Virginia, Personal Property and Land Tax Lists, 1782-1813 Sources (see notes below)_____

The James Dennerson on the lists for 1782-1783 is missing from those of 1784-1786, and there are no other DENNISONs on these lists.

From 1787 on, there are three lists per year, but DENNISONs appear on only one of them, the list of B. Edward Hunston, except for the years 1794, 1795, 1797, and 1803 when there's a John Dennison on one of the other lists. Very usefully for genealogists, and exceeding the mandate of the legislation of 1786 and 1787, the FauquierCo lists from 1788 on continue to list the names of other tithables in the household besides the person chargeable for the tax, even though after 1787, only the number of WMTs age 16+ was required to be tallied. I don't think that the tax commissioners were completely rigorous in listing these young men by name as soon as they reached the age of 16, but the fact that some of these youthful names seem to drop off the list in certain years cannot be explained by the fact that they owned no taxable personal property, as many people in this status are nonetheless listed. It's also possible that a few of these young men, sons of other listees, were tallied and/or even listed by name as dependents in other households.

As though in compensation for this boon, starting with the 1790 list of long-time tax commissioner Edward Hunston, but becoming endemic when he was permanently replaced in 1797, the surname "Dennis" is often written when we would expect a spelling variant of DENNISON. **I have accordingly, abstracted all the DENNISes on the same lists as DENNISONs**, though not the Samuel Dennis, and one Daniel Dennis, who appear on the lists for the northeast district of FauquierCo; I think that these really are unrelated DENNISes.

I've also abstracted, for a few key years only, a number of other FauquierCo names known to be or possibly linked with DENNISONs—ANDERSONs (since James's wife was supposedly an ANDERSON, friend Willam JETT, and John MOREHEAD, with whom James1 DENNISON of FauquierCo had extensive dealings, and who was adversary in [Two suits in chancery](#). These abstracts show that the JETT and MOREHEAD were fairly close neighbors of James, and the 1815 land tax records in turn show that their land lay near the head of the western branch of Thumb Run, some 20 miles NW of the courthouse and many miles north of Thumb Run Church.

In addition to the comments interspersed with the following abstracts, see my a detailed analysis and summary of these lists and their implications at "[The DENNISONs of Fauquier County, Virginia](#)".

The land tax records are easily summarized: James DENNISON was taxed for 138a from 1788-1807, then supplanted for the 138a by son Thomas for 1809-1810; while John DENNISON was taxed for 147a from 1793-1807, then supplanted by Isaac DENNIS[ON]. for 1809-1813—though from 1811-1813 the quantity of Isaac's land was changed to 174a, probably correcting an incorrect transposition that had worked in the favor of Isaac's predecessor, John. Since Isaac's tenure of this land extended to 1813, we get a bit additional information as to its location. It was indeed in Leeds Manor (which was only a tiny fraction of the rentable Fairfax holding, AND on Carter's Run, which places it near the town of Marshall, and from 7-10 miles due east of James's close neighbor, John Morehead on Thumb Run in the Manor.

John P. Alcock, the author of *Fauquier Families* (1994-2001) apparently found what amounts to a hybrid personal property tax list *cum* tithables list, which adds an additional tally column for tithables aged 16-20, and to this James Dennerson entry, a named co-resident tithable of his household aged 16-20 named **Henry**—presumably James's oldest son.

1784-1786 **FauquierCoVA**—No DENNISONS, though James's neighbor, boss, and nemesis, John Morehead is on all and with no extra WMTs.

The fact that James and Henry Denison are listed adjacent and had their tax information gathered on the same date means that they were almost certainly close neighbors, and given that one owned only horses, and the other only cattle, I suspect that they resided on the same property and shared its fruits and responsibilities as partners. And given that this is the first appearance of Henry by name in the county records, that he had just been married on 22Mar, and all the evidence of James operating solo in these parts for many years previously, these two can only have been father and son.

John Denison, whose tax gathering date is just 6 days later, probably lived in the same neighborhood, and is likely to be a relative of James and Henry, though he cannot be James's known son John, for several reasons.

First, the whole set of circumstantial evidence underlying my reconstruction of James's conjugal family, points to an approximate birth year for son John of 1772, and even if he had been born in 1770 or 1771, it is highly unlikely that the tax commissioner would consider him old enough to be taxable for a horse, or for John to have had the money to pay the tax.

Second, there is only one John DENNISON on these lists until 1793 (which is when James's son John first emerges as a WMT16+ who is old enough, probably just turned 21, to be taxable for a horse) and this John is every year from 1788-1792 and beyond, closely associated with Isaac DENNISON, who is either shown as a dependent in John's household, or bracketed with him and having the same, or almost the same tax gathering date. While it is possible that John and Isaac are brothers, it's far more likely that they are father and son.

Third, the FauquierCo land tax records show that John Denison acquired a Fairfax lease of 147a in 1793 and maintained it at least through 1807 (with 1808 being a non-tax year) and on the 1809 lists we find that Isaac Dennison has replaced John as the holder of this 148a. The 1791 PPTax records show this John, bracketed with Isaac, now also having for the first time a dependent (son) Jonathan, who is just coming of age.

While there can hardly be any question that the John DENNISON who appears on these lists associated with Isaac, and later Jonathan, was the son of James Sr, it is true that in his first appearance on the FauquierCo PPT lists, in 1787, he is said to have himself been non-tithable, and for the years from 1782-1787, after which the qualifying age for the tally of White Male Tithables was dropped from 21 to 16, that usually meant that the person in question, though a head of household, and/or a person owning taxable property, had been exempted from paying the poll tax for one reason or another—usually old age or some other disability. It's possible that this new John DENNISON found some excuse to be exempted, but more likely the fact that he isn't tallied as a WMT21+ was just a mistake. And if this John had (improbably because he was taxable for a horse) actually been James's son, why wasn't his age tallied as 16-20?

1787 Commentary - continued

Meanwhile, all the Andersons on Hunston's list have been abstracted here because James Denison may have married an Anderson: of these Anderson household, the one headed by John Anderson is the most likely candidate to be James's brother-in-law, or father-in-law, by reason of geographical propinquity.

John Morehead, evidently a close neighbor to James in 1787, was James's boss from 1773-1774, and that the two had extensive dealings otherwise is shown by the suits in chancery between James Dennison and John Morehead of 1791, and 1793, abstracted [here](#). Morehead's 1815 land tax records show him holding several tracts, presumably more or less adjacent, around the head of the West Branch of Thumb Run Creek, about 20 miles NE of the county courthouse in Warrenton, or in other words, in the Manor of Leeds where the least that James Donaldson [DENNISON] acquired in 1788 lay.

The number of WMTs for John was initially written "2", then rubbed out partially and apparently overwritten by "1"; if that's the case it would be consistent with the non-tithable status of this John in 1787, though not in 1788 and other years. See my notes under 1787 above concerning the implications of John's non-tithable status, and in explanation of it's anomalous fluctuations.

This is the first of many appearances of "Dennis"s on the lists from 1787 on when a DENNISON spelling was expected.. Since this John Dennis is clearly not John the son of James DENNISON, he is presumably the John Dennison who appears to be the father of Isaac on earlier lists, given the fact that Isaac is sometimes listed in his household, or they are bracketed together, or have close tax gathering dates, as here.

William Jett, Peter Jett, and William Jett Jr are all bracketed together with the dates 2-3Apr.

Here it seems that the senior John resurfaces, [bracketed](#) with his putative son Isaac, while next son Jonathan is just reaching the age of 16. However, from this point forward, this John is counted as a tithable, and the only way that that could make sense is if this John, like Jonathan & Isaac, is a son of the former John Sr, who most likely died abt 1790.

James's daughter Mary is said to have married Anthony Haley. The Haleys of FauquierCo were also close neighbors of James form 1788-1790, and in the same general area for 1787. The tax lists indicate that the father of this family, John Haley, had an oldest son named John who was of age by 1787; that John Sr died about 1788 leaving widow Mary; and that the Haleys who begin to appear in the subsequent years (William, Richard, then Anthony in 1791), were her sons just reaching the age of 16. Although 1785 has been suggested as a marriage date for Anthony and James's daughter Mary, 1798 is more like it, and Mary was probably born abt 1774, like her future husband. Both were aged 45+ in the 1820 USC for HarrisonCoVA.

In the Manor of Leeds in NE FauquierCo, in the general vicinity of Thumb Run Church. Carters Run is one of the most prominent streams in mid-FauquierCo. It runs roughly N to S and empties into the Rappahannock at Waterloo in FauquierCo, on the border with CulpeperCo to the south. I haven't been able to find a map that shows the outline of the Manor of Leeds, where James lived, but today's Manor of Leeds Road roughly parallels Carters Run in the shadow of the Blue Ridge Mountains, and a Manor of Leeds Creek ventures further east, towards Carter's Run. It's possible that Carters runs through the eastern part of the Manor, but in any case it's not far east of its eastern border. Presumably List A of John Fishback also covers the eastern portion of FauquierCo, so the third John who appears on the county lists for 1794 and 1795 may have lived not far from John of Carters Run, and may, in fact, have been his son.

Given the grouping on this list, this non-tithable John Dennis[on] who is bracketed here with Isacc [sic] would seem to be the son of JohnD-X, not the son of JamesD-F (here, James Sr). However the fact that next year we find a “Dennis[on] John son to James” with a separate listing, suggests that this John L C is also the son of James, presumably settled on different land, as the 1802 list also suggests. And the “L C”, used here to differentiate him from the other Johns (JohnD-X, and/or his son John) most likely stands for L[ittle] C[obbler], which perhaps locates James’s son John, a bit farther down Thumb Run Road in the direction of Thumb Run church, and perhaps as near as a half mile north of the church, which was claimed by Edmond Dennison, a son of this John and a grandson of JamesD-F.

I have for this year looked through the complete 1815 land tax list (which identifies the nearest watercourse or other major terrain feature to each tract and it’s distance and direction from the courthouse, by road, not as the crow flies) for landholders with the same 1802 tax gathering dates for JamesD-F and his sons, 22 and 23Mar. I found many for 22Mar, most of which were up in the NW corner of Leeds Manor, like John Morehead, namely, Aaron Fletcher (Thumb Run, 28miles NW; Jonathan and Rubin Gutridge (Carters Run, 18 miles NW; and Colburt Mason (Thumb Run, 20 miles NW).

For 23Mar, the actual date for JamesD-F with his land in Leeds Manor, there were very few, and these suggest a somewhat different, closer in, circuit, really just Francis Payne (Sr & Jr, whose land was on Carters Run, 12 miles NW; John B. Smith (Thumb Run, 14 miles NW); and William Suttle, 303a of Dulin (Carters Run, 8 miles NW).

This John Anderson continues to be a close neighbor of JamesD-F (see the lists for 1787 and on), but this John looks like a contemporary of James, a possible brother-in-law, not a father-in-law, though it seems to be a good possibility that JamesD-F's 2nd son John named his own first son [John?] Anderson for his mother Nancy [Anderson?]'s father John Anderson..

For this year (the last with tax gathering dates, I've repeated the exercise I performed for 1802, looking for landholders in the 1815 list whose tax gathering dates are proximate to those of James & Co. In this case, I've limited my abstracts to just people with the date of 24Mar: John Dulin (Carters Run, 6 miles NW); James Foley (Thumb Run, 20 miles NW); Colbert Mason (Thumb Run, 20 miles NW); James Payne (Carters Run, 18miles NW); John R. Short (Red Oak Mtn, 24 miles NW); and Jacob Weaver (Thumb Run, 17 miles NW).

Loudoun County, Virginia, Tithables Lists, 1758-1799

The LDS FamilySearch Catalog has no entry for the PPT lists of LoudounCo, except for the paper-published abstracts of Shreiner-Yantis and Love for 1788 and 1789, as part of their series of county PPT booklet abstracts that were published adjunct to their 3-volume *The 1787 Census of Virginia*. Thus, whether other original PPT records exist for the county, I am unable to tell.

However, it turns out that, unlike in virtually all other counties, a substantial portion of the LoudounCo tithables lists for the period 1758-1799 have been preserved, filmed, and digitized, and researcher Steve Dennison, of the DENNISON DNA Patrilineage 5 Project, has discovered this and found three LoudounCo tithables listings across the years 1765-1768 that putatively pertain to his ancestor, James Dennison of FauquierCo, which lies on LoudounCo's southern border, where Steve's ancestor James begins to appear in mid-1772.

This LoudounCo James Dennison appears always on the county sublist of tax commissioner Leven Powell. For the years 1765 and 1767, he's a tithable of one Thomas GOREHAM, and presumably he was in 1766 as well, although since most of the lists for 1766 are missing, we can't tell for sure. In 1768 we find James as a tithable of Joshua Taylor, but he is missing entirely from the lists of 1769 and 1770, after which I discontinued my comprehensive scan of these lists. Besides canvassing these post-1768 records, I've also scanned the early LoudounCo tithables lists back through 1762, just to make sure that earlier records for this James DENNISON weren't missed.

I've abstracted not only the households where this James Dennison is to be found in certain years, but also the same households for other years, to show his absence. And because just a few years after this period, in 1772, one James Dennison of FauquierCo, the county to the south of Loudoun, sold all his personal property to this same tax commissioner, Leven Powell, I've abstracted Powell's household as well. Finally, as an aid to locating the bounds of Powell's LoudounCo tax district and because neither of the householders who harbored James Dennison of LoudounCo owned land, I've also abstracted the households of certain CHINNs on Powell's list, because it turns out that, like Powell, they lived in the area where Goose Creek runs across and along the border from FauquierCo to LoudounCo in its journey to the Potomac River. And since I've also recently found, from the FauquierCo land tax records, that James held a lease from 1788-1807 in Leeds Manor, which lies in the NWesternmost part of Fauquier at the head of Thumb Run, his migration S to Fauquier covered only about 10 miles.

Since I've covered all the LoudounCo tithables records from 1762-1770 (and I suspect that Steve may have done likewise), the question remains: what can we conclude about the period of residence in LoudounCo of this James Dennison? IF the lists were complete, we could reasonably say that he lived there and was of the tithable age of 16 only from 1765-1768, and since the lists were compiled and published by July of the year at the latest, that he departed the county for parts unknown some time between the summer of 1768 and the spring of 1769.

But many of the lists are clearly not complete, and there's no way of knowing for sure whether any of them are, so I've also made a count of the numbers of pages for each year, although the size comparisons from year to year can only be rough, since the various tax commissioner had very different ideas about formats, and how much white space to allow in their compilations. Here, though, are the raw statistics (counting only continuous sets of page with actual tithables entries on them): 1762(16); 1763(none); 1764(14); 1765(37); 1766(5); 1767(51); 1768(37, but these are very compact with crowded pages); 1769(42); 1770(27, also quite compact).

It appears, therefore, that only the lists for the years 1765, 1767, 1768, 1769, and probably 1770 are complete and can be relied on. The batch for 1770 may be a bit short because that was the year that the area of LoudounCo north of Goose Creek was hived off of Loudoun's Cameron parish to make Shelburne Parish, and this may have affected the gathering of the tax information.

Thus, given the incompleteness here, we aren't entitled to make a strong inference that James Dennison was NOT in LoudounCo before 1765, or that if he was, that he hadn't yet reached tithables age by that time. Nonetheless, I think it overwhelmingly probable that he wasn't there in either 1769 or 1770.

The name of the tax commissioner is missing from the couple of alphabetized pages that the above entries come from, though they immediately follow similarly formatted pages from the list of Leven Powell, and they appear to be in the same hand. Both lists have CHINNs on them and it appears that none of the names overlap. I suspect, therefore, that this second list, which is also dated 1765, is a supplementary list of Leven Powell.

My source for the lists for 1787-1812 was FamilySearch [Film# 7856288](#)

The Jonathan who is the only DENNISON in this county is supposed to have married Jane Morgan there 13Dec1781. Be that as it may, for DENNISON researchers, this Jonathan (whose name was occasionally spelled "Denniston", is a red herring, because he continues as head of the only DENNISON household in the county until he made his will on 29Dec1808, which was probated 27Mar1809, and names as "sons" only two sons-in-law, Hugh WALKER, and Thomas IVERSON. Accordingly, I've merely abstracted him here for a few typical years.

Mindful of the GIVEN, HANNA, and HENDERSON connections to James DENNISON, in the years abstracted below, I've abstracted certain people of those names in some years, and made photocopies of all the surnames beginning with "G" and "H" in others. There were GIVENs in NicholasCo as early as 1818, in particular William Given, but no DENNISONs there until James first appears in 1850—the year he is found, age 21 (when he should first have appeared on the county tax lists by name) living in the household of Joseph Hanna.

The fact that James Denison's tax information wasn't gathered on the same date as Joseph Hanna's suggests that James lived with different NicholasCo families during before his 1854 marriage to Jane Given.

* 1852 NicholasCoVA *

The county personal property tax list format was expanded as of 1852 across Virginia to include cattle, and to tabulate not only the total number of white male tithables aged 16 or over in the househole, but also the number aged 21 or over.

Ohio County, Virginia, Personal Property and Land Tax Lists, 1785-1813

Although OhioCoVA was created in 1776, the county tax lists are extant only from 1785 on, and a number of them are missing. The tax commissioners of this county evidently failed to follow the Commonwealth mandate to canvass their districts systematically, and note the date on which each household's tax information was gathered. Nonetheless, it's overwhelmingly probable that there was just one DENNISON family head, James, with later sons (in order): William, Jessey, Robert, Mathew, and Andrew. James first appears in the county lists for 1791, and in 1797 he acquired 24a of land which he held until his death about 1811, when the land passed to "James Dennison heirs". I've noted these land holdings below only for the years of acquisition, the years it was recorded as belonging to his heirs, and a few other years where James doesn't appear in the PPTs (or there is no list), but does still appear in the land tax list.

SOURCE:

My source for the abstracts through 1814 was the Binns online database, which consists of photocopies of the original fair copy lists filed by the county sheriffs with the Commonwealth authorities in Richmond, and microfilmed and archived by the Library of Virginia.

I expect that "James one sun" is supposed to mean "James and one son", and the single WMT16+ of his household implies that James himself was exempted as a tithable on application to the county court, probably on account of his age—most likely he was 60+ as of this year.

Pittsylvania County, Virginia, Personal Property Tax Lists, 1782-1812

The surname spellings of all three of the senior DENNISONs of PittsylvaniaCo (James, Benjamin, and Richard) at times wander into the phonetic territories of DONALDSON and DANIELSON, and my searches have been broadened accordingly for "DENNISON+"es. See my analysis below for a considered [interpretation of these PPTs for the DENNISON+s of PittsylvaniaCo](#).

Sources: for 1782-1786 [FamilySearch DGS 7856161/2](#), for 1787-1812 [the Binns online database](#) for 1813-1823 [FamilySearch DGS 8151589](#), and for 1824- [FS DGS 8151590](#).

	214L Danereson, Abraham	1	-	1	4

The county clerk for this period not only followed erratic phonetic rules for unfamiliar surnames, he also indulged in a garlanded script, which blurs the letters n, s, m, u, and v. And though the surnames of James and Abraham appear to be identical, later lists suggest that Abraham's surname was probably DAVIDSON, while James's floats among phonoetic variants of DENNISON, DONALDSON and DANIELSON.

Thomas, Rawley, and Lazarus Dodson (bracketed together) are close neighbors of Ragland on the same subt, while George, Joshua, and Fortunatus Dodson were close neighbors to James Danelson on a different sublist. Since Abraham has gone DAVIDSON, I've ceased to follow him.

Analysis: DENNISON+s in the Personal Property Tax lists of PittsylvaniaCo, 1782-1832**The Surname Spelling Issue**

I've adopted the token "DENNISON+" to represent the unusually wide variation in surname spelling for the DENNISONs of this county. It's meant to extend the phonetic umbrella to include soundalikes for DONALDSON and DANIELSON, as well as DENNISON.

First, it needs to be understood that until the 1800s were well advanced even quite literate people spelled all but the most familiar words the way they sounded to them when they were pronounced by their bearers according to many different accents. When Noah Webster's first *Dictionary* was published in 1806 it introduced to America the novel idea that there was one "correct" spelling of every word. For most people, most of the time, their language was an oral affair, and it took at least a generation for this idea of correct spelling to take root.

Thus, there's nothing particularly problematic in presuming that the James Danerson who appears on the Pittsylvania lists in 1782 and in most of the years thereafter through 1812 is one and the same man regardless of the morphology of his surname, and in spite of the fact that this one and only James occasionally switched lists. This conclusion is also endorsed by the consistency of his household composition from year to year.

James is also quite consistently separated in his tax gathering dates (indicators of neighborhood proximity) from the other two seniot DENNISON+s on the list, Benjamin and Richard, though other evidence indicates that all three of these patriarchs lived in the same general SE area of the county. The spelling of Benjamin and Richard's surnames were more also likely in PittsylvaniaCo to fall under the DENNISON phonetic umbrella, but in Benjamin's two Maryland marriage records, his surname is spelled "Danielson" and "Donaldson". For these and other reasons (descendants of both families migrated to the same south central KY counties) these two sets of DENNISON+s are likely to have been related, even though Y-Chromosome DNA testing shows that they had different patrilineal ancestry.

It sometimes helps, in resolving these dilemmas of surname spellings to consider who the recording clerks were at various times, and it's particularly helpful when they change, because the phonetic spelling of the surnames more often than not changes with them, and provides one with an increasingly accurate picture of how the bearer pronounced his own surname. Only the most literate and educated people during this period had any definite idea of how their name was "supposed" to be spelled, even though the majority could manage an occasional crude signature to an important document.

Benjamin and Richard DENNISON appear on the list of Robert Devin from 1788-1797, who is succeeded in 1798 by Jeremiah White. This list covers the southern portion of the county and it also includes James through 1796. Then, from 1798-1801 James appears on the other list (the list kept by John White starting in 1794) as "James Dennison".

Annotations I came across indicate that John and Jeremiah White were merchant partners of the firm White & White. It's likely, therefore, that they were both fairly literate, and more important familiar both with the pronunciations of most of the names in their districts, and of the relationships, if any, between people with similar sounding names. This in turn makes it somewhat likely that they would have both heard and spelled the names of men known to be related approximately the same.

Nonetheless, after spelling James's name DENNISON from 1798-1801, John White then spelled it like DONALDSON from 1802-1806. during which period James was joined by other DONALDSONs—presumably his sons just reaching either the age of 16 or of 21.

What the PittsylvaniaCo PPTs tell us about the likely sons of the patriarchs James and Benjamin DENNISON+

In 1804, James's household includes two additional WMT16+, and in 1805, James, William, and John Donalson are [bracketed](#) together (listed adjacent with the same tax gathering date). The PittsylvaniaCo marriage records show that William Dennerson married in Oct1803, and John Dennison in Oct1804, and though James wasn't a surety for either marriage, their first appearance on the tax lists in 1805 bracketed with James almost certainly means that he was their father. One anomaly: in 1805 James still has two extra WMT16+, but later bracketed records show that he probably had two more sons, James Jr, and Stephen, and the tax commissioner may have decided to tally them in 1805, both having reached the minimum tithable age of 16.

After 1805, Benjamin and all of his sons (none of whom ever appear on the PittsylvaniaCo PPTs by name^[3]) removed to Kentucky, and he is next found, at aged 45+, heading a household in BarrenCoKY adjacent to households headed by Zachariah and Samuel Dennison. There are two late 1805 PittsylvaniaCo marriage records indicating that these two were both Benjamin's sons: Benjamin is a surety on the marriage bond of Zachariah, and gives his consent for the marriage of his underage son Samuel.

In 1806, the only DENNISONs remaining on the lists are James, William, and John, again [bracketed](#) together. One would expect to find Richard on this list too but he doesn't reappear until 1807, when Richard Dennison and John Dennison (widely separated in date) join James and William Donalson (petogether). There were no taxes in 1808.

From 1809 all DENNISON+s are on the same tax list, and their surnames always receive the phonetic spelling DENNISON. These include, besides Richard and John, James Dennison Sr, and (with their tax information gathered on the same date) James Dennison Jr and William Dennison.

Both James and Richard appear to have remained in PittsylvaniaCo for the rest of their lives. Both head households in the county in 1820, and though James drops off the PPTs after 1820, a county order book entry shows that this was because he was exempted at that time from all future taxes, on account of age or disability.

What the PittsylvaniaCo PPTs tell us about the likely sons of the patriarch Richard DENNISON+

Richard first appears on the PittsylvaniaCo lists in 1793 and continues thereon through 1831. On 23Jun1831 Richard made his will (probated 18Jul1831) naming a wife Elizabeth, and sons Thomas and James D. Like the grown sons of Benjamin, neither of these sons ever appeared by name on the PittsylvaniaCo PPTs, but for several years Richard's household includes an extra WMT16+ or two, and interestingly, for the year 1821, there is a separate listing for Elizabeth Dennison, bracketed with Richard.

The first time that Richard has extra WMT16+ was in 1802 and 1803, and then not again until 1807. In 1804 a new DENNISON+ appears in the PittsylvaniaCo PPTs—John, who is bracketed that year with Benjamin and Richard. I think that this was a son of Richard not Benjamin because the WMT16+ tally of Richard was decremented from 2 to 1 in that year, and because Benjamin's conjugal family has been extensively researched downstream in KY, where he and several of his known sons headed 1810 households clustered together first in BarrenCo in 1810 and then in HartCo in 1820 (which was created from Barren in 1819), but none of these clustered households is ever headed by a John. On the other hand, there is one in 1820 headed by John Dennison (aged 26-44) of CumberlandCoKY (adjacent to Barren), and my guess is that the putative 1804 son of Richard may actually have been the first of these PittsylvaniaCo DENNISON+s to head to KY, as early as 1805 when he disappears for good from the PittsylvaniaCo PPTs. As noted above, the John who appears in the

³ It appears that the tax commissioners of PittsylvaniaCo only listed young men by name after they had set up households of their own, regardless of their age. This policy was by no means the usual practice.

PittsylvaniaCo lists starting the next year (in 1805) is often bracketed with James for the remained of this John's tenure in PittsylvaniaCo, which ends for good in 1812. Of course it's also possible that the 1820 John of CumberlandCoKY was the son of James.

Since Richard's 1831 will names only sons Thomas and James D, if John of 1804 was the son of Richard, he presumably died before 1831. And by the same token, we can reasonably presume that the extra WMT16+ in Richard's household from 1807-1809 (though the year 1808 is missing) was second son Thomas (listed first in the will), and the third son James D came along later. Richard again has an extra WMT16+ in 1811 (when his household consists of "Richard and son"), and in 1814. It would appear that these sons left, perhaps also for KY about the time they came of age, since they never appear by name in the PittsylvaniaCo PPTs.

What the PittsylvaniaCo PPTs suggest about family relationships between the patriarchs James, Benjamin, and Richard

Y-Chromosome DNA (yDNA) testing of patrilineal descendants of the PittsylvaniaCo DENNISONs shows that patrilineal descendants of James belong to DENNISON Patrilineage 2, while Benjamin's descendants are of DENNISON Patrilineage 6—thus these two PittsylvaniaCo patriarchs are mutually unrelated, at least through the paternal line. And this raises the question of which patrilineage Richard of Pittsylvania falls into.

The tax list evidence associates Richard much more closely with Benjamin than with James. Richard is actually [bracketed](#) with Benjamin the first time he appears in the PPTs, in 1793, and in a number of lists thereafter; while Benjamin and Richard rarely have tax gathering dates close to those of James—though they are almost always on the same tax list for the southern half of the county, and their dates often place them in the same general region of this half. This tax list proximity evidence is fully consistent with the other location evidence of their land records^[4]

⁴ I examine this issue in more depth in my report "[The Pittsylvania County, Virginia, DENNISONs of Patrilineages 2 and 6](#)".

Rockingham County, Virginia, Personal Property Tax Lists, 1814-1847 (Src: the LVA films listed below)

Daniel² DENNISON and family, including son John³, settled early in RockinghamCo in the Dry River area to the west of “North River” (the northern fork of the Shenandoah) near the northern border of AugustaCo to the south. In the 1780s, Daniel² removed to Kentucky with all but one of his sons, John², who in 1790 moved south just across the border to AugustaCo, where he settled in the Naked Creek area, where his descendants continue to be found until the 1730s and beyond. Two descendant DENNISONs appear in the much later records of Rockingham as well—Samuel⁴ (John³, Daniel²) from 1830-1835, and John for just the year 1843. This is probably the same John who appears in earlier and later years on the AugustaCo lists, and he is most likely John⁵ (Samuel⁴). Because this John is known to have married Sarah Landes in AugustaCo in 1840, I have abstracted (and photocopied) certain LANDES records as well, mostly in AugustaCo, but also those for 1843 in RockinghamCo, since that was the year that the putative John⁵ appeared there.

SOURCES:

My source for the abstracts through 1814 was the Binns online database, which consists of photocopies of the original faircopy lists filed by the county sheriffs with the Commonwealth authorities in Richmond, and microfilmed and archived by the Library of Virginia. After 1813 my source was this same series of microfilms borrowed from the Library of Virginia on interlibrary loan, viz.

I find no DENNISONS in RockinghamCo from 1785-1789, though the lists for 1785 look incomplete. Daniel² and James³ left for KY sometime during this period, while John relocated to Naked Creek about ten miles south in AugustaCo and begins to appear on that county's tax lists in 1786. Likewise, there were no DENNISONS in RockinghamCo from 1814 through 1829, inclusive. It's only for the years 1830-1835 that we find Samuel M. DENNISON in Rockingham, and thereafter just one sighting of Samuel's possible son John, in 1843, on the same list as his future LANDES in-laws: I suspect that this list erroneously brought in residents on the opposite bank of North River, on the AugustaCo side.

These additional DENNISONS from 1830 are abstracted on the subsequent pages.

Washington County, Virginia, Personal Property Tax Lists, 1782-1820

For WashingtonCo I've abstracted not only all instances of DENNISONs for this period, but for the years 1782-1787 for those lists that contained DENNISONs, all the in-laws surnames BUCHANAN, DOUGHERTY, and SCOTT (there were many more SCOTTs that I didn't abstract, on other lists).

Although for the generally unalphabetized lists for 1782-1786 I've scanned all the pages of all the lists and noted the names and exact list titles, in the abstracts following I've omitted lists with no DENNISONs and standardized the titles just to "List of < name >".

For the first several years, there are two, essentially duplicated, lists—on the second one the given names are generally abbreviated to the first initial, and the data is written out within a single box for each family (or person chargeable); the second lists adopt a more convenient to peruse columnar format. I've inferred the identity of these paired lists both from the total number of whites at the end, and from spot checking. The duplicate list for 1782 is misarchived and misfiled as 1786 List B.

SOURCES:

My source for the abstracts through 1805 was the Binns online database and also the FamilySearch images, both digital image of films of the original faircopy lists filed by the county sheriffs with the Commonwealth authorities in Richmond, and microfilmed and archived by the Library of Virginia. From 1806-1820 my source was this same series of microfilms borrowed from the Library of Virginia on interlibrary loan, viz. WashingtonCoVA Personal Property Tax lists Ree1 341 1806 -1827/1.

 * 1782 WashingtonCoVA *

The totals for this year are: 1064 white male tithables, 383 black tithables, 4884 horses, and 8855 cattle.

The abbreviated list this year also includes consolidated population totals: 962 white tithables, 261 black tithables, 4187 horses, and 7703 cattle. The total amount of the personal property tax due for the county, including the 10 shillings charged for each tithable, was £1129/9/9, or about \$82,000 with respect to today's prices for commodities; with respect to today's purchasing power in labor services the value of that amount would be \$1,780,000, 20 times the commodity price value, or about \$5000 for each householder. Taxes were high at this time because the new republic was trying to cope with the overwhelming costs of the Revolutionary War. Colonial taxes were practically non-existent by comparison, and were assessed largely in labor services—working on road gangs, and serving in the militia when called up.

List of A. Outlaw (unalphabetized) This list immediately follows that of Capt. James Fulkerson's, and spans pages 9R-11L, but it has no heading. Fortunately, there's a duplicate (summary) list from which I derived the listholder's name: A. Outlaw.

There are evidently both lists and parts of lists missing for this year. Many of the pages for this year are torn more or less in half (perhaps leaving gaps), and have been reassembled in an order that is somewhat scrambled. I found many of the names from Outlaw's 1783 list on one ostensibly headed by Robert Campbell.

I found no DENNISONS this year.

 * 1785 WashingtonCoVA *

There may be missing lists this year, but the last page of the booklet has a total of 859 whites, which is in line with previous years..

I found no DENNISONS this year.

 * 1786 WashingtonCoVA *

There are 858 white tithables this year—virtually the same as last year.

DENNISONs, *et al.* in the Virginia County Tax Lists, from 1782 On

From 1787 on the tax collection of Washington and all other VA counties was standardized, and for WashingtonCo there were always just two lists for the period covered here. Until 1803, DENNISONs appear on only one of these when they appear at all.

 * 1787 WashingtonCoVA *

As noted above, the 1787 lists, uniquely, include the names of dependent white males of a household aged 21 and over; In this population there were almost no instances of supernumerary males with surnames different from that of the household head. In the abstracts for this year, where the name in the 4th column is the same as that in the third (indicating that the only WMT21+ in the household was its head, I've replaced the name with the token "self".

Wythe County, Virginia, Personal Property Tax Lists, 1793-1830

Although WytheCo was created as of May1790 (from the southwestern half of MontgomeryCo, thus bordering WashingtonCo to the NE), the first extant personal property tax lists for Wythe are for 1793, when there were three lists. From 1794 on the tax lists were continuous (except for 1808 when no VA taxes were collected), but there were just two county lists for each year.

The intrinsic titles for the A lists of 1796 and 1797 below show that this list covered the northern portion of WytheCo—the area north of Walker’s Mountain most of which was hived off to create TazewellCo as of 1Jan1800. The DENNISONs seem to float somewhat between these lists, one was counted twice (John in 1795), and sometimes they were missed altogether (1798-1799). I think that this can be explained by the hypothesis that though they all lived on the same or nearby land (mostly that of John2 or Robert2), that this land lay astride the somewhat amorphous boundary between the tax district covered (usually) by List A, north of Walker’s Mountain (as indicated by the intrinsic list titles of 1796 and beyond). And since WytheCo was split along approximately the same boundary, creating TazewellCo to the north as of 1800, some of these DENNISONs may have been thrown into TazewellCo, without necessarily having changed their places of residence. Robert, reappears after the county split in WytheCo, and, according to the tax gathering dates, his household was typically one of the first or the last to be visited by the tax commissioner canvassing his district; this too is consistent with Robert’s land lying at one of the district (or after 1799 county) geographic extremities. I’ve tentatively located at least some of these DENNISON lands from their deeds, but more work needs to be done in this area.

Many of these lists have switched the standard order for the two slave columns; wherever I’ve encountered this I’ve switched them back to the standard order shown in the headings below.

The fact that two John DENNISONs, both the owners of 6 horses, appear on both the A and the B lists this year, suggest that they were one and the same John, and that his land lay near, or possibly astride the boundary between the northern and southern WytheCo tax districts.

It's no accident that David's information was gathered at a widely divergent date since he apparently lived some 40 miles away, near New River.

On 15Nov1796, John purchased 253a in WytheCo, consisting of two adjoining tracts in the Rich Valley, on the North Fork of the Holston River, north of Walker's Mountain. Since Walker's Mountain was evidently the boundary between the northern and southern WytheCo tax districts, we can therefore place John this year (and probably also in the preceding years) in the northern district, and this Robert [Jr]—Robert Sr of WashingtonCo being Robert2 (John1), in the southern district. Robert2's land also lay in the Rich Valley and on the waters of the North Fork of the Holston, and the sons of Robert2 who later appear in WytheCo (George, Samuel, William, Scott) were always on the northern list. It's therefore possible that Robert Jr of the southern list was not Robert2's son Robert.

The only DENNISON household in the 1830 USCensus for WytheCo is headed by Scott Dennison (aged 30-39).

The DENNISON Patrilineages of Virginia

The largest patrilineage of DNA-tested DENNISONs is Patrilineage 1. This tribe of Scotch-Irish derive ultimately from an ancient Scottish gentry family, the modern spelling of whose name evolved to “Denniston”, with a “t”. In America, the Scotch-Irish DENNISONs were among the first settlers, first, of the Pennsylvania backcountry, and then of greater AugustaCo in the Valley of Virginia, beginning in the 1730s. The first two DENNISON Patrilineage 1 families were headed respectively by a Daniel and a John Denniston. One of Daniel’s DENNISON grandsons, John, remained in AugustaCo until the 1830s, while his son and other DENNISON grandsons all ended up in Kentucky, by way of the Virginia panhandle, where possibly one or two descendant DENNISON families may have remained. The children of the rather closely related family of John (who was perhaps a second cousin once removed of Daniel), also began in Augusta, but his progeny and descendants settled primarily in the Virginia panhandle, with some filtering on into Tennessee.

DENNISON Patrilineage 2 first emerges in Pittsylvania County (created from HalifaxCo in 1767), and the descendants of this family of DENNISONs who have at least one cousin in Buckinghamshire, England, are actually of Scandinavian origin, and it is likely that the PittsylvaniaCoVA branch descended from one of the settlers of the short-lived colony called New Sweden (1638-1655), planted on the Delaware River that separates Delaware and New Jersey, and runs up as far as Philadelphia in Pennsylvania. When this colony was elbowed aside by the English, many of the settlers, most of whom arrived without permanent hereditary surnames, fanned out in various directions, joining the tide west into Pennsylvania and Maryland, and south into the Chesapeake tidewater area, and then the Virginia piedmont and “Southside”.

A third patrilineage of Virginia DENNISONs, now denominated Patrilineage 5, first appears in Fauquier County, in the northern Virginia piedmont, that runs north to south along the eastern slopes of the Blue Ridge Mountains. Most of these made the leap due west, over the mountains, in the early 1800s to the wilds of HarrisonCo, in now West Virginia. It is not at present known where they came from.

Then there is the family of John & Mary DENNISON, who first appear about 1782 around Back Creek, in the westernmost portion of Augusta County, in the Valley. This couple had sons named John, Thomas, and Jonathan, and at least a couple of daughters. DNA testing shows that this family is unrelated by blood to any of the preceding Virginia DENNISON patrilineages, although since at present we have only one tested descendant of this family of John of BackCreek, via his son Jonathan, it is theoretically possible that this line nominally derives from one of the other DENNISON lines, by way of an [NPE \(Non-Paternity Event\)](#). The sons of this family moved on into the Appalachians, into BathCo and then other Virginia and Kentucky counties farther west, and the largest number of counties whose personal property tax records have been abstracted here track their progress.

The annual Virginia personal property tax lists (as well as the corresponding land tax lists, which aren’t dealt with here) supply much of the evidence that we have for all of these DENNISON patrilineages, so it is important to cultivate a thorough understanding of the lists, and how they were compiled in order to interpret and evaluate them correctly. Their value as evidence stems both from the fact that they were compiled every year, and from their near completeness across all Virginia counties from 1782 (or whenever the county was founded) on well into the 1800s. And the more complete this collection of DENNISON abstracts is (especially if it is supplemented by the corresponding land tax records), the more convincingly we can parse this collection of DENNISON data into individuals and families.

A Comprehensive Survey of All the DENNISON in Virginia, 1787, 1790, and 1800

The only years for which there are comprehensive name indexes of the Virginia personal property tax lists are 1787, 1790, and 1800. The tax records of 1787 have been fully abstracted in a set of published volumes titled *The 1787 Census of Virginia*, while the lists for 1790 and 1800 have been indexed by [Binns Genealogy](#), thus creating surrogates for the missing USCensuses for Virginia of those years. However, the index for 1800 is missing a number of the western counties, including BathCo, which was created from AugustaCo in 1791, but I have myself canvassed the tax records of the most promising western counties for DENNISONs page by page, and year by year, so the indexes merely provide reassurance that I haven't missed any promising counties.

For the year 1790, DENNISONs (“Dennison”s and “Denison”s) are found only in the counties of Augusta (Mary, widow), Middlesex (Jonathan), Fauquier (John, Isaac, and James), Greensville (James), Washington (John), and the Independent City of Petersburg (William). The first of these, Mary, widow, is the wife and mother in the family we are here focusing on, while Jonathan of tidewater MiddlesexCo is not only so remote as to be highly improbable, he can be ruled out conclusively because he made a will not long after 1800 in which he did not name a son Jonathan. I know nothing about the DENNISONs of Greensville and the City of Petersburg, but neither of these areas was a jumping off place for settlers of the Appalachian region, while John of WashingtonCo was a descendant of the unrelated Scotch-Irish “Denniston” families of AugustaCo, designated Patrilineage 1 in the DENNISON DNA project. That leaves the FauquierCo DENNISONs of the VA Piedmont, who are indeed known to have made the jump to western VA in the early 1800s, but a descendant of that line has been DNA-tested and has been shown to be unrelated to a descendant of Jonathan of LawrenceCoOH—unless one of these ancestral lines features a fairly recent NPE, which is not very likely.

By the year 1800, the trail of the family of Jonathan is well established in BathCo, and Jonathan himself appears there in the list of 1802, however, for the record, the Binns 1800 personal property tax list index (which is missing BathCo and many others) turns up DENNISONs in the counties of Augusta (John), Fauquier, Greensville, Middlesex (Jonathan again), Pittsylvania (James), and Wythe (Robert). Of these John of AugustaCo and Robert of WytheCo (adjacent to WashingtonCo in the VA panhandle) belong to Patrilineage 1, James of Pittsylvania is of the unrelated DENNISON Patrilineage 2 line, and the DENNISONs of FauquierCo, who were shortly to make the leap west over the mountains to HarrisonCoVA, belong to Patrilineage 3.

It will thus be seen that virtually all of the VA DENNISON families who sent, or might have sent offshoots west in the Appalachians, can be accounted for, leaving only the family of John & Mary of western Augusta and Bath Counties that might have included Jonathan as a son, and lo and behold, it is only in the same counties as the other provable sons of this family (John and Thomas) that we find Jonathan, from 1802 on.

Tracking Jonathan Dennison of Lawrence County, Ohio, back to his Natal Family

My principal research focus of late has been to find and follow through the annual Virginia tax list records one particular family of western Virginia DENNISONs, which I shall identify here as the conjugal family of John & Mary Dennison of Back Creek, in present day Bath County, Virginia. However, since in the process I have either abstracted or considered the records for all the counties descendant from Bath's parent, the greater AugustaCo which, when it began functioning in 1745 extended in principal as far west as the Mississippi River, this report has ended up as a compendium of abstracts of many of the western Virginia counties in which DENNISONs are to be found. I have also abstracted many of the known or likely in-laws and neighbors, where these were relevant to identifying my DENNISON subjects.

Altogether, I have been quite comprehensive in my search for DENNISONs, considering the personal property tax lists of virtually all of these western Virginia tax records, at least for the period roughly from 1777 through about 1810, with an especial focus on the middle and northwestern counties that were hived off from greater AugustaCo in chunks beginning with Botetourt in 1770, but I have also, for a previous DENNISON research project, searched the PP tax records of the panhandle counties of Washington and Wythe where other DENNISONs are known to have early settled, and have made abstracts for these areas, which I have also taken into account, though I am not reproducing those abstracts here. It appears that all the DENNISONs of Washington and Wythe were of the Scotch-Irish Denniston family (note the "t"-spelling), known at the DENNISON DNA project as Patrilineage 1.^[5]

However, while I have considered all of the western Virginia, and also the eastern Kentucky counties, I have only examined and abstracted from the most promising, as indicated above. I've included MontgomeryCo in my abstracts here, even though it appears that the only DENNISONs to be found there were also descendants of the Patrilineage 1 line, because there is one much later record linking Jonathan to MontgomeryCo, and I wanted to make it clear that there are no other traces of him, or of his putative relatives, there.

These tax records, in combination with the unique given name Jonathan and his association with brothers John and Thomas, have made it possible to trace this lineage back from Appalachian Ohio, Kentucky, and Tennessee, to BathCo and AugustaCo Virginia, where evidence I had turned up in my comprehensive study of 18th century AugustaCo DENNISONs could be brought into play.

⁵ In its strictest sense (and simplifying a bit), the term "[patrilineage](#)" in this context refers to the male line descendants of the earliest known patriarch who bore a particular surname. In ordinary discourse we would say that different patrilineages are completely unrelated to each other by blood. DNA testing can reliably sort males into the right patrilineages. In a looser sense, "patrilineage" might be used to refer to all the descendants of a particular patriarch, female as well as male.

Notes on the DENNISONs of Augusta County, Virginia

By 1782 when the new Commonwealth county tax regimen had been legislated into existence, there were two distinct, mutually unrelated DENNISON patrilineages represented in AugustaCo. The DENNISON family from which DENNISON Surname DNA Project member Dale Edwin Dennison descends lived in the far west of AugustaCo from 1782-1790, when that area was hived off to help make the newly formed BathCo, and these DENNISONs continued there for a number of years. I've done a detailed study for Dale and traced his DENNISON ancestors into southernmost Ohio, over the succeeding decades.

The main line of DENNISONs who pioneered in AugustaCo as early as 1738, belonged an entirely different patrilineage, which I've identified as [DENNISON Patrilineage 1](#). The link is to the Y-Chromosome DNA genealogical project I've created for members of this patrilineage who've had their yDNA tested at Family Tree DNA. You will find there detailed descendancies for many of the branches of this extensive tree.

This DENNISON patrilineage in America descends primarily from two early AugustaCoVA immigrants, the first of whom was Daniel¹, who settled about 1738 in Beverley Manor, near present day Staunton, the county seat of AugustaCo, in the broad and fertile Valley of Virginia. Daniel¹ had a single son, Daniel², but Daniel² had many children, including six sons, all but one of whom had migrated to Kentucky by 1800. Linked to the DENNISON Patrilineage 1 Project page you will find lengthy, evidence-rich reports on both Daniel¹ and his descendants, and on the stay at home AugustaCo son, John³ (Daniel²-1).

The other AugustaCo DENNISON Patrilineage 1 immigrant, John¹, first appears in AugustaCo in 1756, and was dead by 1776, leaving, it appears, three sons. Of these, Robert² settled in WashingtonCoVA in the panhandle, and he had numerous sons himself, who spread out into other panhandle counties, and into Tennessee, particularly Jefferson and Grainger Cos. TN. The limited evidence regarding John¹, and also the John¹ DENNISON of Dale Dennison's patrilineage, has been compiled and presented in Appendix A to my Daniel¹ DENNISON report, but the DENNISON Patrilineage 1 Project page also has very extensive descendancies for the descendants of John¹ of Patrilineage1.

Some More Detail on Daniel¹ and Descendants in AugustaCoVA

In the decades just before making the big jump to Kentucky, Daniel¹'s only son Daniel² and several of his sons, had relocated from central AugustaCo to the northwest, to an area around Dry River, a tributary of North River (the north fork of the Shenandoah River) in what as of 1778 became southern RockinghamCo. Then, about 1785, all but Daniel²'s son John³ departed, and John himself sold most of his (now) RockinghamCo land and moved south back across the AugustaCo border to the Naked Creek area a few miles to the west and south of North River, which now formed part of the boundary between Rockingham to the north and Augusta to the south. Naked Creek, like Dry River, drains into North River (the north fork of the Shenandoah), and it is in this area around North River that all the remaining DENNISON descendants of Patrilineage 1 are to be found through at least 1860.

John³ (Daniel²-1) retained an interest in a 44a tract around Dry River that he had surveyed on 1Dec1790 and patented on 5Apr1792, but he most likely sold this land shortly thereafter since his relocation to Naked Creek proved permanent; if he didn't, though, this property would have fallen to his son Samuel by will in 1824. There is, however, no record of the sale of this RockinghamCo land, probably due to the fact that the majority of the RockinghamCo deeds before 1864 were lost to a fire in that year incident to the Civil War.

John³ had purchased his original Dry River tract from one Daniel Smith, as early as 18Aug1772, which gives us one of the checkpoints for estimating his likely 1751 birth date, and it appears that he and his wife Mary sold this land to one Benjamin Smith about 27Feb1786.

Given this history, it's therefore not surprising to find that John last appears on the RockinghamCo personal property tax rolls in 1784, and next appears on the Augusta rolls of 1786. Thereafter, except for one last year (1790) when the widow Mary of the other John DENNISON whose land was relegated to BathCo after 1790, all the DENNISONs that appear on the tax rolls of AugustaCo through at least 1860 evidently belonged to the descendant line of this John³.

However, there are two features of these AugustaCo tax records that emerge from this data (considered in the light of the other DENNISON evidence) that are of general interest in interpreting the AugustaCo records.
